

# ELKOCAN Ultrasonic Thickness Gauge

The model ECT260 & ECT300 are a digital ultrasonic thickness gauge. They are capable of measuring the thickness of various materials with accuracy as high as 0.01 millimeters. It is suitable for a variety of metallic and non-metallic materials.

### Main Functions:

- Capable of performing measurements on a wide range of material
- Four transducer models are available for special application
- Probe-Zero function, Sound-Velocity-Calibration function
- Two-Point Calibration function.
- Two work modes: Single point mode and Scan mode.
- Coupling status indicator showing the coupling status.
- Battery information indicates the rest capacity of the battery.
- Auto sleep and auto power off function to conserve battery life.
- Optional software to process the memory data on the PC.
- Optional thermal mini-printer to print the measured data via RS232 port.
