

## Endoscope Borescope X4

### Product Overview:

The Endoscope Borescope X4 is a high-quality inspection tool designed for industrial, automotive, and technical applications. Equipped with a 2MP camera, a 10-meter flexible cable, and a 4.3-inch display, it provides clear and detailed visuals even in hard-to-reach areas. Featuring a CMOS sensor, adjustable 8-LED lighting, and a wide 70° viewing angle, this device is perfect for inspecting pipelines, automotive engines, electrical systems, and industrial equipment. The 2000mAh rechargeable battery and CE/RoHS/ISO9001 certifications ensure reliable and safe performance.

---

### Key Features:

- ✓ High-Resolution Camera – 2MP for sharp and clear imaging.
  - ✓ 10-Meter Cable – Long, flexible, and durable for multiple applications.
  - ✓ Adjustable LED Lighting – 8 LEDs with brightness control for optimal visibility.
  - ✓ 4.3-Inch Display – Real-time video display without the need for an external device.
  - ✓ 70° Wide Viewing Angle – Captures more details in every inspection.
  - ✓ CMOS Camera Sensor – Ensures high-quality image processing.
  - ✓ Rechargeable 2000mAh Battery – Provides extended operation time.
  - ✓ Operating Temperature: -10°C to +45°C for versatile use.
  - ✓ CE/RoHS/ISO9001 Certified – Meets safety and environmental standards.
-

## Technical Specifications:

- **Camera Diameter: 8mm**
- **Resolution: 2MP**
- **Focus Distance: 2cm – 10cm**
- **Lighting: 8 Adjustable LEDs**
- **Viewing Angle: ~70°**
- **Display Size: 4.3 inches**
- **Battery Capacity: 2000mAh Rechargeable**
- **Operating Temperature: -10°C to +45°C**
- **Certifications: CE, RoHS, ISO9001**

### **Ideal For:**

- ✔ **Automotive Inspections – Examine engines, fuel systems, and mechanical parts.**
- ✔ **Industrial Maintenance – Suitable for pipelines, machinery, and HVAC systems.**
- ✔ **Electrical & Circuit Inspections – Identify issues in wiring and electronics.**
- ✔ **Plumbing & Home Maintenance – Detect blockages, leaks, and other structural problems.**
