

Endoscope Video Borescope Model X5 – Professional Inspection Tool

Product Overview:

The Endoscope Video Borescope Model X5 is a professional and advanced inspection tool designed for industrial, automotive, and technical applications. With its high-quality 2MP camera, 10-meter flexible cable, 4.3-inch display, and adjustable LED lights, the X5 allows users to perform precise inspections in hard-to-reach or dark environments. Whether you're checking pipes, machinery, or automotive engines, this versatile borescope ensures high-resolution imaging and efficient performance.

Key Features & Specifications:

- **Camera Quality:** 2 Megapixels CMOS sensor for clear, detailed images.
- **Cable Length:** 10 meters, allowing easy access to tight spaces and long-distance inspections.
- **Display Screen:** 4.3-inch color display for live viewing, no need for external devices.
- **Adjustable LED Lights:** 8 built-in LED lights with adjustable brightness for enhanced visibility in dark or low-light conditions.
- **Focusing Distance:** 2 to 10 centimeters for close-up, detailed inspection of small components.
- **Viewing Angle:** Approximately 70° for a wide coverage area.
- **Battery:** 2000mAh rechargeable battery for extended use without frequent recharging.

- **Operating Temperature:** -10°C to +45°C, ensuring reliable operation in a wide range of environments.
 - **Standards Compliance:** CE, RoHS, and ISO9001 certified for quality and safety.
-

Applications:

- **Automotive Inspections:** Inspect engines, pipelines, and mechanical components without disassembly.
 - **Industrial Use:** Check pipes, air ducts, electrical systems, and other equipment in hard-to-reach areas.
 - **Maintenance & Repair:** Perfect for detailed inspections of electrical and mechanical systems.
 - **Home & HVAC Inspections:** Check plumbing, ventilation systems, and air conditioning ducts with ease.
-

Why Choose the X5?

The Endoscope Video Borescope Model X5 is ideal for professionals who require high-quality, real-time imaging for diagnostic and inspection purposes. Its long cable, high-resolution camera, and adjustable lighting make it the perfect choice for detailed inspections in difficult or dark environments.

Whether you're an engineer, technician, or automotive specialist, the X5 offers clear images, reliable performance, and ease of use in every situation.

Product Dimensions & Packaging:

- **Borescope Length:** 10 meters (flexible)

- **Display Size: 4.3 inches**
 - **Weight: (Insert weight here)**
 - **Included Accessories: (Insert any included accessories like chargers, cases, or additional cables)**
-
