Industrial Endoscope Camera – Model C22

🔧 Product Overview:

The **C22 Industrial Endoscope Camera** is a professional inspection device designed for precise visual examination of hard-to-reach areas. Equipped with **dual cameras**, **360° rotation**, and a **7-inch TFT color display**, this device is ideal for pipeline inspection, automotive diagnostics, construction monitoring, and technical maintenance tasks.

★ Key Features:

- **Dual-lens camera** with 85° wide viewing angle
- **360° pan rotation** for comprehensive area coverage
- **20-meter cable** with a 7mm diameter reel
- **7" TFT color monitor** with 1024×600 resolution
- **8-level digital zoom** for detailed viewing
- **Simultaneous video and audio recording** (AVI format)
- **Image capture in JPEG format**
- **Supports SD card and USB flash drive up to 256GB**
- **High-brightness adjustable LEDs** for dark environments
- **Waterproof design – IP68 rating**
- **Battery runtime: over 7 hours**
- **Durable aluminum alloy and fireproof carry case**

✂ Applications:

- Internal pipeline and sewage system inspection
- HVAC duct and chimney inspection
- Vehicle engine and undercarriage diagnostics

- Wall cavity, ceiling, and floor structure observation
 - Maintenance, repair, and troubleshooting in industrial environments
-

Package Includes:

- Dual-lens camera probe (23×77mm)
 - 20m fiberglass cable with reel
 - 7-inch TFT monitor with control panel
 - Power adapter and battery charger
 - Rugged aluminum carrying case
-
