Elcometer 266 DC Holiday Detector

Elcometer 266 DC Holiday Detector

At a glance:

Safer, easier & more reliable testing than ever before

Avoids coating damage by limiting current

Ideal for field, site or laboratory testing

Can be used in accordance with:		
ANSI/AWWA C 213	AS3894.1	
ASTM D4787	ASTM G 6	
ASTM D5162	ASTM G 62	
BS1344-11	EN14430	
JIS G3491	JIS G3492	
ISO 2746	NACE RP0274	
NACE RP 04901	NACE RP0188	

The Elcometer 266 DC Holiday Detector provides accurate detection of pinholes, flaws, inclusions, thin spots and bubbles in a coating.

The gauge has been specifically designed to revolutionise high voltage DC testing of coatings, making it safer, easier and more reliable than previously possible.

Current limiting to avoid coating damage:

When the Elcometer 266 detects a flaw, and sparks, the current flow reduces to a low level, minimising risk to both the user & the coating.

Automatic voltage calculator:

No need for lookup tables, simply enter the coating thickness value and select the standard & the gauge will automatically set the voltage.

Safety hand grip:

Ensures that high voltage can only be generated when the handle is being held.

Internal jeep tester:

Removing the need for 2 gauges. The closed loop system with internal voltmeter guarantees the voltage output at all times.

Specialised handle design:

Extended ribbing on the handle provides an effective barrier between the high voltage and the user.

Rugged and waterproof to IP65:

Rugged, waterproof IP65 case is sealed against the elements.

Accurate sensitivity adjustment:

Allows use on metallised or slightly damp coatings.

Rechargeable & replaceable battery packs:

Battery packs can be charged inside or outside the gauge.

Interchangeable handles:

0.1–5kV, 0.1–15kV or 0.1–30kV adjustable in 0.1kV steps.

Pinhole & Porosity Detection

Premature corrosion of a substrate is usually due to the failure of the coating. A major cause of failure is the presence of flaws in the finished coating.

Collectively referred to as a coating's porosity the main types of flaw are described below:

Runs & Sags The wet coating moves under gravity leaving a thin dry film.

Cissing

Occurs when a coating does not re-flow to cover the voids generated by air bubbles being released from the surface of the coating.

Cratering

Occurs when the substrate is wet or if the coating has poor flow characteristics, thus creating voids in the coating.

Pinholes

Caused either by air entrapment which is then released from the surface, or by the entrapment of particulates (dust, sand etc) which do not stay in place.

Over Coating If too much coating is applied to a substrate, as the coating cures it can crack from internal stresses of the coating.

Under Coating
Areas not coated, or the
coating flows away from the
particular edges, corners or
a substrate and welds.
Furthermore over a rough
surface profile, insufficient
coating may leave the
profile's peaks exposed.

Part Number	D2661	D2662	D2663		
Voltage	UK 230V	EUR 220V	US 110V		
Compatible with 0.1 – 5kV handle	✓	✓	✓		
Compatible with 0.1 – 15kV handle	✓	✓	✓		
Compatible with 0.1 – 30kV handle	✓	✓	✓		
Waterproof IP65 case	✓	✓	✓.		
High voltage output accuracy	±5% or ±50V below 1000 Volts				
Measured current flow accuracy	±5% of full scale				
Display resolution	100 Volts, 1μA				
Output current	0 – 100μA maximum				
Operating temperature	0°C to 50°C (32°F to 120°F)				
Power supply	Internal rechargeable lithium ion battery, fully charged within 4 hours				
Typical battery life (backlight off)	DC5: 40 hours DC1	5: 20 hours	DC30: 10 hours		
Typical battery life (backlight on)	DC5: 20 hours DC1	5: 15 hours	DC30: 8 hours		
Instrument case	High impact ABS				
Earth lead length	10m (394")				
Dimensions	520 x 370 x 125mm (20.5 x 14.5 x 5")				
Weight	Base unit (including battery pack) 1.2kg (2.7lb) Handle: 0.6kg (1.3lb)				
Packing list	Elcometer 266 DC Holiday D for high voltage handle, 10m clip, battery charger and main plastic carrying case, operation The Elcometer 266 DC Holid select the part number for you numbers listed below.	(394") earth signal rens cable, band brushing instructions. Tay Detector does not	eturn lead with crocodile n, shoulder strap, tough t include the handle,
