Digit-X

DIGINDT.IR
FGJ-NDT.IR

The Digit-X is a portable, compact, high quality device for carrying out your X-ray film processor quality assurance programme.

It is a unique hand-held transmission densitometer combining ease of use with high accuracy and repeatability. The fine fibre-optic probe allows small areas of film to be measured accurately with readings being displayed on the large clear LCD panel to 2 decimal places. Battery power means that the Digit-X is not limited in its areas of operation and it's so light - just 175g - that carrying it from place to place is extremely practical.

Battery usage is minimal and a low battery warning indicator is provided on the digital display. A version is available with an illuminated display.

Digit-X comes complete with its own battery in a handy sturdy portable carry case, ready to use straight away.

Digit-X Kit Specification			
Density Range:	0.00 - 4.00OD	Power Supply:	9v PP3 Battery
Fibre Optic Aperture:	3mm	Battery Life:	Alkaline 2500Hrs
Resolution:	0.01OD	Battery Life*:	250 Hrs
Accuracy:	0.05OD	Size:	210x60x40mm
Repeatability:	0.02OD	Weight:	175g
Drift:	0.0005/min
